

## COVERAGE

# 82 economies, pre-calibrated.

*Every economy below ships with a bespoke calibration — trade openness, inflation target, debt-to-GDP, and, where relevant, commodity and tourism shares — mapped to the model archetype that fits its structure. Pick a country and the model assembles itself.*

## TEMPLATE (1)

Generic country — a neutral starting point for an economy not yet in the roster.

**Don't see your country?** The platform is built for extension — bespoke country calibrations and modules can be added for institutional customers without touching the core. Contact us via [bellmandsge.com](https://bellmandsge.com).

*Coverage spans every IMF region, with deliberate depth on small open economies, commodity exporters, and island states often absent from off-the-shelf DSGE tooling.*
